Dear Harold, ans 5/31 5/27/98

Thanks for the packet of documents you sent last week (Oswald Tickler XII). Currently, I am finally getting a chance to read Jerry's book, which I also plan to use in one of my summer school courses. I got a letter from Bill Reichter the other day in which he recounted his conversation with former FBI man, Don Wilson, who allegedly took some evidence from Ray's car. The attached article about him and this evidence did not seem credible (especially about alleged connections with Jack Ruby), but Bill seems to think he is legit. The fact that the FBI has shown no interest in examining what he has seems consistent with their lack of interest over the years in credible evidence in both the JFK and King assassinations.

Hope you are doing ok. Regards to Lillian.

Best,
Gerry

P.S. You may already be aware of this Book-of-the-Month Club promotion of Posner, which I enclose.
